

## **Environmental Friendly, contributing to a plentiful society. Everything is for “people.”**

Technology that is friendly to the environment and technology that contributes to a plentiful society: DNT considers these two things are the same. We keep creating products valuable to the customer and to the society with the concept of “Green & Clean” because we want to support lots of smiles through paint.

# **Green & Clean**

### **Green: the color of freshness, hope, safety, and assurance**

Using green as the corporate color, DNT has created a large number of environmentally friendly paint such as zero volatile organic compound (ZERO-VOC) paint, "lead free / chrome free," and "toluene free / xylene free." And, we declare our dedication "creating an environment friendly to the earth and the people" in the future as well.

## responsible care

Based on the concept of "sustainable development," through the entire process from product development, production, distribution, application, and final consumption to disposal, and also in all projects DNT participates, maximum consideration towards environmental preservation and people's safety and health is given. We work towards enhancing social trust.

## concept

### Developing products friendly to the environment and people.

We deepen an awareness of the environment in all of our activity, and provide products that take into account the assurance of resource conservation, energy conservation, product safety, and environmental preservation.

### Safe and low emission manufacturing.

Endeavoring towards the assurance of environmental preservation, health, and safety, we plan for the reduction of energy, waste and carbon dioxide emissions.

### Heightening employee awareness in company activities.

Enhancing the environmental issue awareness of all company employees, we carry out company-wide.

## action plan

Comfort and safety for customers

Setting environmental standards

Compliance as first priority

Conformity to ISO14001

Creating a recyclable & returnable system

### Environmental Report

We publish environmental report as a vital tool for a larger number of people to understand the entire DNT environmental activities and invite opinions. The report is shown by online.
